

BOLTLESS RACKING SYSTEM

Boltless racking system is typically used for industrial bulk storage and offers a self-contained design that is similar to pallet racking rather than traditional shelving. ... These boltless racking units are heavy duty metal units that use strong, particle board decks or wire racking for storage.

Boltless Racking System generally design for quick assembly and NO single bolt & nut use to construct a unit of boltless racking system, tremendously reducing installation costs over traditional slotted angle. Boltless racking is ideal for small parts storage, archive storage, record storage, and more.
